

Road to Washington Meeting – Geneva

4 types of presentation/discussion topics at this meeting

- **Status quo – health service separate from community-based services, separate from social protection**

- coverage of services
- disconnection of CBOs from health service
- PMTCT stats
- Issues the health system has not been able to tackle alone (including rights violations etc)
- Barriers to women, families, PLHIV, key populations & their children

- **Examples of programs / program models** where there have been linkages between the health system and community-based organizations & peer support/ PLHIV groups

- **Data that proves making linkages with communities & with social protection has had an impact** on women & children, PLHIV, key populations in terms of:
- reducing rates of vertical transmission
- reducing stigma and other barriers to health system access

Recommendations

- Frameworks
- Program support/funding
- Scale-up
