

“Everything should be made
as simple as possible,
but not simpler.”

Albert Einstein

RECAP MOBILIZING COMMUNITIES

Lorraine Sherr

Children

- If we do nothing keep what we are doing now, by 2015, 367,000 new infections in children

Issues

- Background situation (HIV prevalence, health care starvation, crippling ratios, health care drain, demand > supply)
- VCT
- Disclosure
- Treatment/adherence
- Engagement of communities
- Good models and their, evaluation, documentation, capture and roll out
- Resistance to family centered approach
- Marginalized

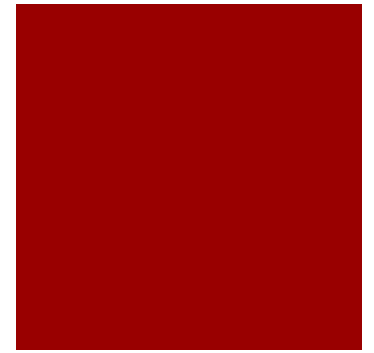

Cascade

- Cascade as a funnel?
- Concept/terminology issues
- Typology (burden care resources)
- Measurement debate
- What do we mean about community what are they good at and **what are they not good at? (McDermott)**

Synergies

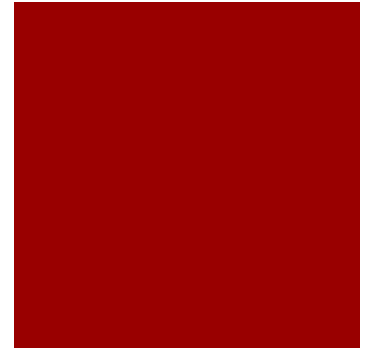

Providers

- Dependence on volunteerism is not sustainable
- Mothers to Mothers (paid) redefine team (Besser). Work out standards (graduate = fired/limited contract) – inclusion criteria, training, move on to what?
- Quality of provision (Kiplangat)
- Outreach (Mukaratinwa)
- Critical appraisal of services (barriers in the clinic Mohlala)
- Waiting times – client flow.
- Health worker attitudes

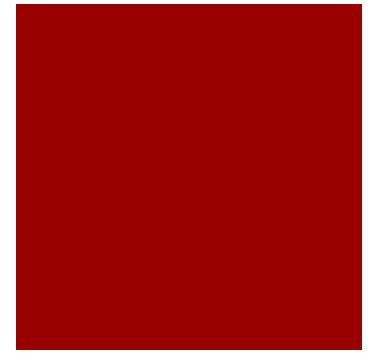

Infant feeding

- Breast feeding core
- Breast feeding more than food.

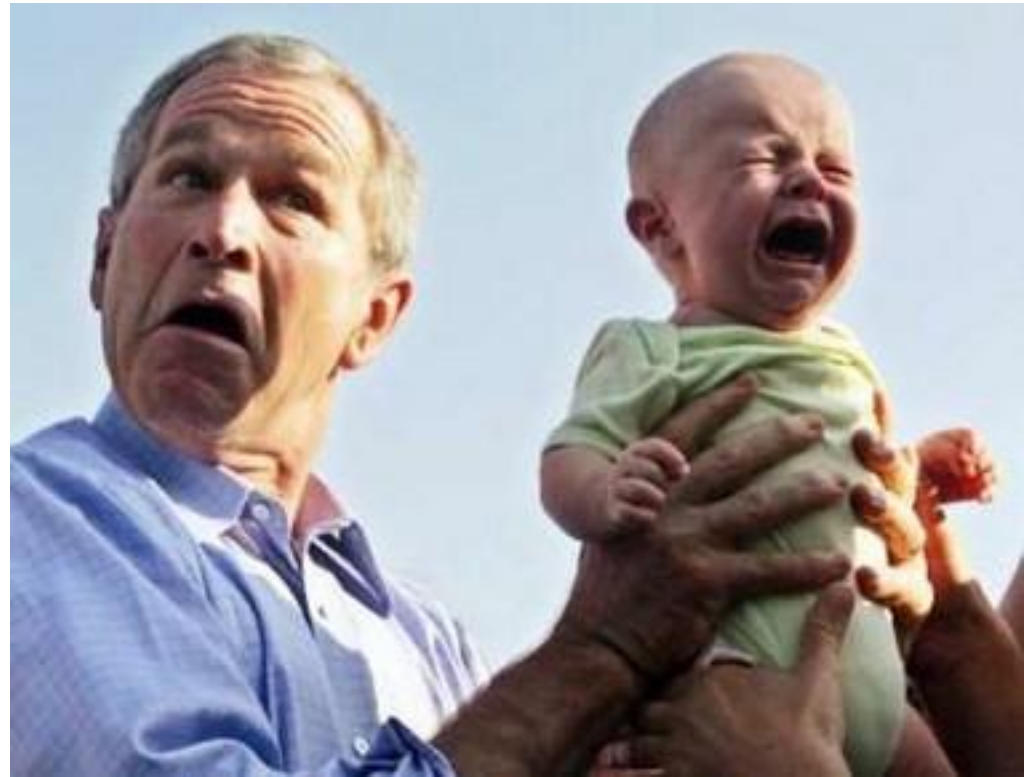

Loss to follow up/ Attrition

Lip service to community or is it the critical resource?

- What is community
- Time/funding question
- Unpaid but vital
- Sidelined, siloed and silent

Continuing to fund doctor/nurse model is insanity - Besser

- Demonstrated variable, substantial and diverse programmatic dysfunction (Phelps)
- Switch? Find bright spots.
- Found? Examples such as Mothers to Mothers (Fahers to fathers?????)
- Bigger, broader and different.
- Scale questions

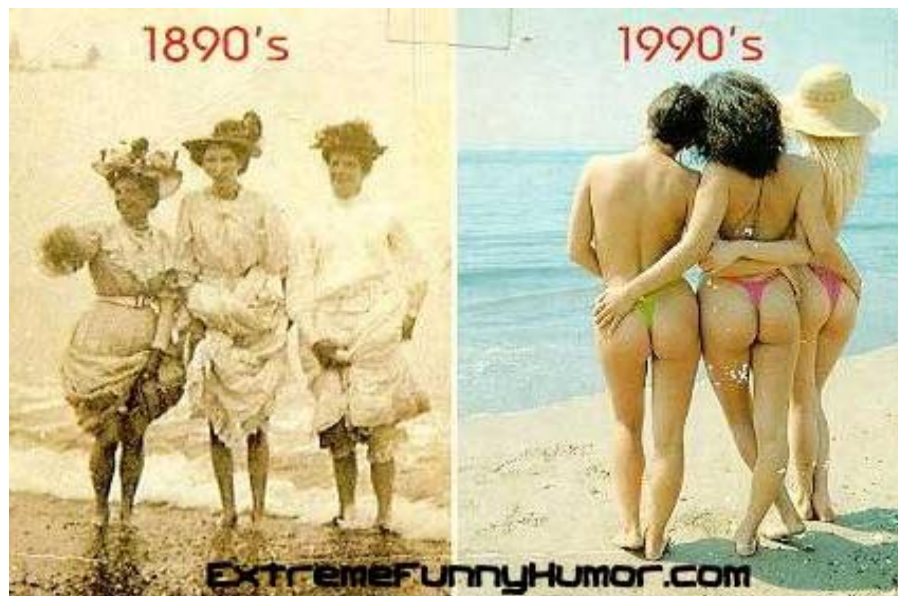

Money

- Analysis of what needs to be done, but resource re-allocation to get this impact.
- Where is the money going now? (McDermott)
- Importance of income for women – if you cant eat.....
- Accountability
- Financial models (Germann)

Evidence-

Men

- Keep creeping in? Couple Counselling, feeding
- Many of the barriers are the clinics themselves (Mohlala)

Possibility for HANDSHAKE – health systems and services

- What does it take to proffer the hand?
- If you build it will they come (Kiplangat)
- Models of provision (Mohlala, Mukaratinwa, Kiplangat)

Thinking Out of the box

- Where do we begin?
- Health only interventions restrictive – ceiling effect (Rollins)
- What about looking into other boxes? (eg Framing – Rollins – psychology of decision making).
- Ladder to get to the higher fruit (Kiragu)
- Enabling the blindingly obvious (Dix)
- Shift of mindset
